

the regal-satanic name but mildly indicates the obnoxious character of the plant.—LEROY H. HARVEY, Hull Botanical Laboratory, University of Chicago.

RANUNCULUS ABORTIVUS, VAR. EUCYCLUS IN HYDE PARK, MASSACHUSETTS.—On June 17, 1900, a few specimens of *Ranunculus abortivus*, var. *eucyclus*, Fernald,¹ were found with the species in a moist shady woodland within the boundaries of the Stony Brook Reservation, Hyde Park, Massachusetts. Specimens are preserved in the herbarium of the New England Botanical Club and in my own herbarium. The Hyde Park locality is apparently the only station reported in Eastern Massachusetts for this plant south of Ipswich.—F. G. FLOYD, West Roxbury, Mass.

THE STAMINATE PLANT OF ANTENNARIA PARLINII.—While Mr. E. F. Williams and I were making a botanical excursion through the northern part of Wilmington, Middlesex county, Massachusetts, on May 18, 1902, we observed by the roadside and in the adjoining fields unusually fine patches of *Antennaria Parlinii*, Fernald, growing with others of the more common species of this genus. A careful search resulted in the discovery of two small clumps of the rare staminate plants. As this form of the species has been reported before from Maine only (RHODORA, i: 156. 1899), and then in much less abundance, this new station is of much interest. Specimens have been placed in the Gray Herbarium and the Herbarium of the New England Botanical Club.—E. L. RAND, Boston.

FURTHER STATIONS FOR VERONICA CHAMAEDRYIS.—Through the kindness of Mr. J. F. Collins, Curator of the Herbarium of Brown University, I have just seen a specimen of *Veronica Chamaedrys*, L. from Rhode Island. It was collected on waste land in Providence by Edith M. Collins and J. H. Collins, May, 1901. This adds a fifth New England state to those recorded for this plant in RHODORA, iv. 107.

Miss M. E. Blatchford of Cambridge has kindly informed me of a station for *Veronica Chamaedrys* at Andover, Massachusetts, where it was found in grass land by Miss Alice Buck. I have also learned that the station between Cambridge and Watertown was first discovered by Miss Mary Smith of the former city.—B. L. ROBINSON.

¹RHODORA, I, 52.
